

ON-Board Diagnostic Trouble Codes

The list below contains standard diagnostic trouble codes (DTC's) that are used by some manufacturers to identify vehicle problems. The codes provide below are generic codes that may not apply to all vehicles. Vehicle manufacturers may use manufacturer specific DTC codes that are different from the codes shown below. Foreign vehicles may also use DTC codes different from the generic DTC codes. The Division recommends that motorists not depend on the DTC codes in this list for vehicle repairs until they confirm the generic DTC codes apply to their vehicles. The list below is for information purposes only and is not intended for use in vehicle repairs.

Diagnostic Trouble Code (DTCs)

Diagnostic Trouble Code (DTCs) -- Trouble codes are how OBDII identifies and communicates to technicians where and what on-board problems exist. The first number in the DTC indicates whether the code is an SAE generic code (applies to all OBDII systems) or is specific to the vehicle manufacturer. The remaining three numbers provide information regarding the specific vehicle system and circuit. An analysis of a typical OBDII code is shown below.

Following is a list of generic DTCs
